

Travelling rainbow

Use colours and kitchen roll to make a travelling rainbow between water glasses!

You will need:

- Red, blue and yellow water colours or food colouring
- 6 water glasses
- Kitchen roll

Instructions:

Fill three glasses all the way to the top with coloured water: one red, one blue and one yellow. Put them in a circle together with the three empty glasses.

Each coloured glass should have an empty glass on either side.

Fold strips of kitchen roll and dip one end in an empty glass and the other in a coloured glass until all the glasses are connected.

Watch as the rainbow starts travelling and colours mix in the empty glasses!
