

Dear Parents and Guardians,

We are delighted to say we hit the £70,000 target on the last day of the offer (see attached)!

Many thanks for all your help and support!

We've done it!! Minchinhampton School's most ambitious Eco Project is now fully funded!!

Gloucestershire Community Energy Cooperative wants to thank everyone who has supported or invested in the **solar roof system at Minchinhampton School**. We can now proceed with our plans to install the solar panels during the Easter 2022 school holiday.

The project will be fully owned by the community after they raised the £70,000 necessary on the last day of the offer; today, 31st January. The project will help the school achieve:

- lower electricity bills** (less volatile too);
- the generation of **clean, renewable electricity**; and
- a **smaller carbon footprint**.

Well done and thank you!!
